

## Custom Screen-Printing.

Due to the amount of time/energy/cost associated with screen setup our minimum order is 36 prints. (We will print smaller orders but the cost per shirt becomes a bit outlandish.)

Turn around time is 10 days from the time your artwork is approved for printing, if we have the material you want printed in stock. If we have to order shirts, hats, etc. it may take longer. Most of our deliveries come by AML so shipping times will vary depending on what day of the week you place an order.

Print prices are based on the number of colors in your design, and the number of locations you choose to print (ie; front, back, arm, hood, etc). This means if you want a one-color print on the front and a one-color print on the back you would pay for 2 separate one-color prints.

### Screen Printing Prices:

Number of prints	Number of colors (cost per print location)			
				
36	\$3.00	\$4.00	\$5.00	\$6.00
60	\$1.75	\$2.75	\$3.75	\$4.75
96	\$1.00	\$2.00	\$2.75	\$3.50
144	\$0.95	\$1.85	\$2.65	\$3.40
300	\$0.85	\$1.35	\$1.90	\$2.00
500	\$0.50	\$0.75	\$1.00	\$1.25
750	\$0.50	\$0.70	\$0.90	\$1.10
1000	\$0.50	\$0.65	\$0.85	\$1.00

\*\*\* Unlike many companies we do not charge a screen setup charge. We are able to do this for our customers by charging more per print for smaller orders. If you would be interested in continued production, you may buy a screen from shtümpa that will permanently hold your design. If you choose to go this route, ask for a different price structure.

### Artwork Guidelines:

Formats we will accept:

- The original hard copy of the artwork- no larger than 8.5 x 11, as it must be able to fit on our scanner. (Special arrangements can be made to accommodate larger formats.)
- Digital artwork saved as an EPS, TIFF, PSD, or JPEG file. The file should be 300 dpi for the actual print size.

EPS, TIFF and PSD files are preferred because they provide a higher quality print.

If you do save your file as a JPEG, do not compress it. The more you compress a JPEG the more pixilated it becomes. This will not read well on a screen print.
